An enormous amount of defects found in children are evidenced by figure No. 1. The underlying cause of these abnormal conditions, such as eye, ear, nose, throat, chest, bowel and intellectual handicaps is due to posture.

These can only be corrected by a realignment of the displacements by an experienced adjuster or chiropractor who has had special training in this kind of work. Thus making a stronger and happier child, one that is much less liable to contract so-celled disease. A Heathier Child.
